		Optional	Mentee	Mentor	Notes	Developer/Database Notes
MS1	**Registration Page**				We will likely use LinkedIn APIs to allow the mentors to quickly get going, but we will only get very limited data from LinkedIn, so we may need them to provide a few extra things. As far as the mentees, it'll just be a regular signup form. If needed we can do social login, depending on if this is needed or not for V1.	
		Optional	**Mentee**	**Mentor**	**Notes**	**Developer/Database Notes**
	First Name	☐	☑	☑		
	Last Initial	☐	☑	☐	For privacy, only ask Mentee for last INITIAL	
	Last Name Full	☐	☐	☑		
	Email	☐	☑	☑		
	Phone	☑	☐	☐	This will be used for once-monthly text messages, only the most important.	
	Background Check	☑	☐	☑	You get highlighted as a mentor if you've gone through background check. You can sign up for free as a mentor and if you want to do PERSONAL MENTORING YOU HAVE TO HAVE A MEMBERSHIP and that includes a background check	Work on this after the main product is fully complete, it's not needed in the absolute first version. For now, we can just add people to a list "Would you like to offer personal mentoring in the future?" On click adds them to a special table that Scott can get optics on
MS2	**Actions After Submit Registration Page**					
		Optional	**Mentee**	**Mentor**	**Notes**	**Developer/Database Notes**
	User account created, data saved to wp user or to separate user table.		☑	☑	If using separate user table, we'll have all user data together. Would rather not use wpmeta to store this info, so that it's easily detachable and searchable if need be in the future. Please note that IF MENTORS ARE USING LINKEDIN THEN WE DO NOT NEED TO VERIFY THEIR EMAIL. We should allow mentors to use non-linkedin sign in, though.	
	Verification email sent with link		☑	☐	"Hello! Thanks for joining KidsCoach. Click this link to verify your email and get started. https://kidscoach.com/verify/235234jfakns23j	Make sure smtp email is set up and fully verified, with no stop sign icon in gmail. Including proper spf record

			Mentee	Mentor	Notes	Developer/Database notes
	User clicks link, which marks their email verified in the database and they're auto logged in. Take them directly to MS3, but show a popup or dropdown **explaining the main things they can do, like a quick tour.** If Mentee, explain they can ask a question and get it answered by a professional (and then have a button that lets them create their first question). If Mentor, explain they can answer questions by Mentees, or create a company/university to better represent themselves.		☑	☐		kc_settings table change email_verified to 1. Do not allow auto-login in future, just the one time is all.
MS3	**Main QUESTION Feed**		**Mentee**	**Mentor**	**Notes**	**Developer/Database notes**
	On left side, formatted blocks showing one colorful question post at a time, along with video answers from mentors.					These are from kc_questions table, prioritized by number of likes/upvotes and also date (exact algorithm tbd).
	Button to create a question		☑	☐		
	Button to answer a question that is shown on this page		☐	☑		
	Filter to show posts from specific keywords		☑	☑	Select2 allowing to choose multiple keywords (like pill capsules), and if any are chosen, new button that says "Clear Filter" to show all posts again	
	All the likes from the video responses will be aggregated into the question, so the mentee benefits from all the mentor's video response love/curious/insightful all added together		☑	☑		
	Reporting (something is wrong, tell administrator)		☑	☑	stop sign or flag	
	Button to share (copy link)		☑	☑		For someone who clicks this and isn't logged in... goes to the Single QUESTION OR VIDEO Page. For someone who is logged in... just takes them into the app to this, with free range.
	Per one question, WATCH ANSWERS button					
	If the question has no answers, then there's a way to upvote it "This question has no answers. Click here to upvote it so it pops up higher in the mentor feed"					
MS4	**Main Video (REELS) Feed**		**Mentee**	**Mentor**		
	Question at the bottom, small text just like IG Reels		☑	☑		
	Scroll to side to change video (or if on web if we have to implement differently then so be it)		☑	☑		Carousel, and videos are auto-added and auto-removed to keep the whole data package down or what. Trying to make it as seamless and "swipeable" as possible here even if on web

			✓	✓		
	Instead of just a like button, here are the options: Love/Inspiring/Insightful/Curious/Support/Exciting					
	Button to share (copy link)		✓	✓		For someone who clicks this and isn't logged in... goes to the Single QUESTION OR VIDEO Page. For someone who is logged in... just takes them into the app to this, with free range.
	FLOW HERE IS LIKE INSTAGRAM STORIES. Tap on the right and you get the next answer (or if out of answers, then the next question) and if you want to skip question, swipe from right to left. This goes in reverse as well. Tap on the left side and you go BACK one answer. Swipe from left to right and you go BACK one QUESTION.					
	Sorted by showing the videos with the biggest number of responses first. If no emoji response, randomize order. So prioritize the videos with emoji response FIRST, then for the rest of them, show the videos in random order each time					
MS5	**Create A Question**	**Mentee only.**				
		Optional			**Notes**	**Developer/Database notes**
	id	☐				
	question	☐				
	template_id	☐				
	timestamp	☐				
	user_id	☐				
	keyword_main_id	☐			This is dropdown that shows very limited list with 3 options: product/people/operation	From kc_subcategory_main connecting to category 1 (and category #1 is medical, which is the only category we have right now)
	keyword_job_title_id	☐			This is a dropdown that shows searchable list from kc_subcategory_job_title	
	keyword_emotion_id	☐			This is a dropdown that shows limited list from kc_subcategory_emotion	

MS6	**MENTORS-ONLY Questions-To-Answer Page**	Mentors only.				
	Prioritize questions that have the most "Promote this question" votes					
	Allow to click button that says "Answer This Question" which sends them to MS7					
MS7	**Mentor Chose To Answer ONE Question Page**					
	Videos need to be optimized on upload					
	prompts them to add audio or a video (and then text is optional)					
MS8	**MENTOR-ONLY Profile Page**					
	This should be available to general public, but encourage login by showing header bar across the top or pop up after 20 seconds, etc					
	Follow main fields from LinkedIn				**Notes**	**Developer/Database notes**
	They can fill out a simple form that allows them to clarify that they are interested in doing 1-on-1 coaching				(Are you interested in 1-on-1 coaching? Would you want to do a certain number of hours pro-bono for this? Would you want to charge, and if so, how much roughly per hour session?)	
	When editing their profile page, Mentors can create companies and become SUPER ADMIN					
MS9	**Single QUESTION OR VIDEO Page**					
	This is only for people not logged in					
	If someone shares, the person who clicks will start at the specific video that was shared, and be able to see one video in front of or before the current video (so 3 total). To see other videos or questions, they'll need to login.					

		Optional			Notes	Developer/Database notes
	That will give them a taste, but then when they go farther to look at the next or previous video outside the bounds, it'll be a call to action to sign up.					
MS10	**Single Company Page (Public, no login necessary)**	**Optional**			**Notes**	**Developer/Database notes**
	Profile Photo	☑				
	Background Photo	☑				
	Name	☐				
	Location	☐				
	About	☑				
	Newest 3 posts (can click to show more)	☑				On click to show more, just open on same page and load all (push page down)
	Newest 3 videos (can click to show more)	☑				On click to show more, just open on same page and load all (push page down)
	List all Jobs	☑			Dataset here is just Job Name and Link (probably external site)	
	Show all connected people (super admin and regular, clickable to their profile)	☑				
MS11	**Single Company Page (Owner/Edit)**					
	Format of this page is exactly as the public view, but instead of showing read-only text, they're text inputs or text areas. The POSTS section has an "Add New Post" button which goes to the Add Post Page					
	There will be 2 main levels: Super admin - can do everything and Regular (can post, and connect company to Mentor profile).					
	In order to connect to a company page, the super admin can add a person's email and then select whether that person is super admin or regular					

MS12	Mentee Profile (Must be logged in to view)	Optional		Notes	Developer/Database notes
	For this, you must be logged in to view, so we are not exposing Mentee info to the general public. For now we don't need logging for who views the page, but like LinkedIn it may be very valuable in the future to offer something like this				
	For now the only way you get here is by clicking the name next to a question. No search for a specific Mentee now, and no following/liking the person				
	Name	☐			
	Photo	☐			
	Background Photo	☑			
	Occupation/Student	☑			
	City/Country	☑			
	Accomplishments	☑			
	Keyword Interest 1, 2, 3	☑			
	Newest 3 Questions They Asked (can click to show all)	☑			On click to show more, just open on same page and load all (push page down)
MS13	Company Add New Post	Optional		Notes	Developer/Database notes
MS14	Company Add New Video	Optional		Notes	Developer/Database notes
	Video Name	☐			
	Description	☑			re-use same tinymce type module as Post for this
	Video **Link**	must have **link** or **upload** to save			

|						
	Video **Upload**	must have **link** or **upload** to save				Should be limited to certain types like .mp4, .mpeg, .mov etc
MS15	**Company Add Job**	**Optional**			**Notes**	**Developer/Database notes**
	Job name (text input)	☐				
	URL (text input that will become an ahref link on display)	☐				
MS16	**Company Manage Access**	**Optional**			**Notes**	**Developer/Database notes**
	Can click a button to "Add New Person"					
	Email address	☐				
	Dropdown for Super Admin/Regular Access.	☐				Super Admin can access MS16... Regular access cannot access MS16. Super Admin can delete company page and Regular cannot
	Once submitted, it's in the state of "Invited". If they need to be re-invited the super admin can just delete and re-add them. Once they accept, then it's in the state of "Active"					
	When they connect a new person, regardless of whether that person is already on Mentor.Social or not... an email goes out to them that says "Hi <<name>> - You have been added as a user for <<Company/University Name>> on Mentor.Social. Click here to get started"					
	On click, they either get taken to login (if their email ALREADY has a login) OR they get taken to a special registration page that has their email filled and greyed out (cannot be changed). On submit, their mentor profile is created and they're redirected straight to the company page.					
MS17	**Leaderboards**					
	This page has a top tab that allows you to switch between Mentors and Mentees					
	Check kc_likes_tracker for all likes connected with ALL questions owned by each user id, order DESC, show top 10 only.					
MS18	**Mentor Background Check**					
	This should not be on registration form - let people get into the site without having to consider this to lessen friction					

	In Mentor Edit page, they can click a button to submit to a background check and get a special icon on their profile (and next to their name sitewide that is like the blue check on twitter) that will show they've been background checked.				
	This page will consist of all the info needed for them to move forward with the background check. Not exactly sure what that entails. After the background check, change background_check_ok to 1 in kc_mentors table

For the MOST up to date, click here: https://drive.google.com/file/d/1V2oli0Tnibo4uDqebgJJWwIwLkt7S9BH/view?usp=sharing

	List of things to figure out	
	What type of posts, what metadata available and allowed. What tagging, what search. Shareability?	Can tag companies in a post and can share to all social media platforms (twitter, facebook, TikTok, instagram, linkedin)
	What limit on video length, size, or # of videos. Shareability?	Video length no longer than 1 min, no min time. (can post many videos if goes over 1 min).
	Get started with ads and getting people interested / getting emails	ready to get the ads going to start getting people interested
	Create video explaining database	
	Create explanation on flow (backend, frontend) so that devs think wordpress is actually involved. This is to the SIDE of wordpress, not using inbuilt wordpress functionality except for login and database access $wpdb obejct	
	Take off the "Check this box if you agree to receive a background check." from MS1 and please put it on MS8. Please also make it a button instead of checkbox - it will take them to a page where they fill out whatever is needed to start the background check process.	
	MS1- show everything is required except for Phone (like putting a red asterisk next to all the placeholder names except for phone, or just putting (Optional) next to phone)
